JOHN DEERE

PREMIUM COTTON WRAP

FOR PREMIUM AUSTRALIAN COTTON 

TamaWrap+® is the only recommended wrap to allow you to utilise the full capabilities of the new John Deere CP/CS770 Cotton Harvester. **Main benefits are:**

- 8% savings in wrap and handling costs for Picker customers.
- 12% savings in wrap and handling costs for Stripper customers.
- Less plastic (PE) per bale of cotton.

PREMIUM COTTON WRAP

FOR THE AUSTRALIAN COTTON COMMUNITY

TamaWrap+[®] Pink is one of the projects we're most proud of.

It has all the features and benefits of TamaWrap+[®] Yellow cotton wrap, but with an important added value.

Care for All Cancer, Care for Our Communities

TamaWrap+ Pink is more than premium cotton wrap – it's a symbol of support for Australian families facing cancer. Tama has been a long-time partner of the

McGrath Foundation, helping to fund specialist cancer nurses in regional communities when they're needed most.

In 2026, we're proud to stand with the McGrath Foundation as they extend their mission to Care for All Cancer. By choosing TamaWrap+ Pink, you're not just securing premium wrap for your season – you're helping provide care and comfort for families across the country.

Breast cancer is the most **common cancer** in Australia.

57 people will be diagnosed with breast cancer **every day** in Australia.

90% of patients live **within 75km** from a nurse.

It costs **\$140,000** to fund a full time McGrath breast care nurse for a year, including training and development.

McGrath Foundation's mission is to have **250 nurses** by 2025.

1 in 7 women will be diagnosed with breast cancer in Australia.

www.mcgrathfoundation.com.au

SUPPORTING THOSE IN NEED ACROSS REGIONAL COMMUNITIES SINCE 2014.

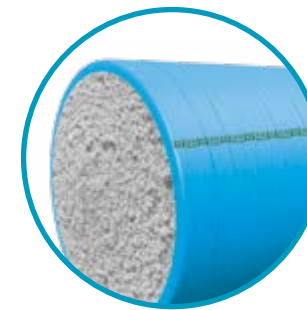

THANK YOU FOR SUPPORTING THIS INITIATIVE.

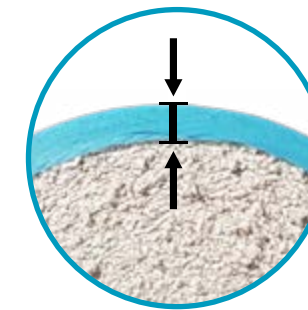

At Tama, we understand the pivotal role premium wrap plays in safeguarding cotton yields, while ensuring cost-effectiveness. With TamaWrap® Blue, we've redefined excellence by merging affordability with top-tier quality.

- **Proven performance** - backed by Tama's legacy of excellence in quality and customer satisfaction, TamaWrap® Blue showcases our dedication to innovation and customer-centric solutions.
- **Cost-efficiency redefined** - our manufacturing process enables us to offer TamaWrap® Blue at an unparalleled price without compromise on quality.
- **Uncompromising quality** - TamaWrap® Blue provides premium protection, durability and resilience.
- **4 RFID** for full traceability from field to future.

TamaWrap Blue: Supporting Mental Health with Beyond Blue

Now in our third year of partnership with Beyond Blue, Tama is proud to continue supporting vital mental health services across Australia. Every roll of TamaWrap Blue helps ensure individuals, families, and communities can access the support they need, when they need it most.

TamaWrap® specifications

WRAP

Radio Frequency Identification (RFID):

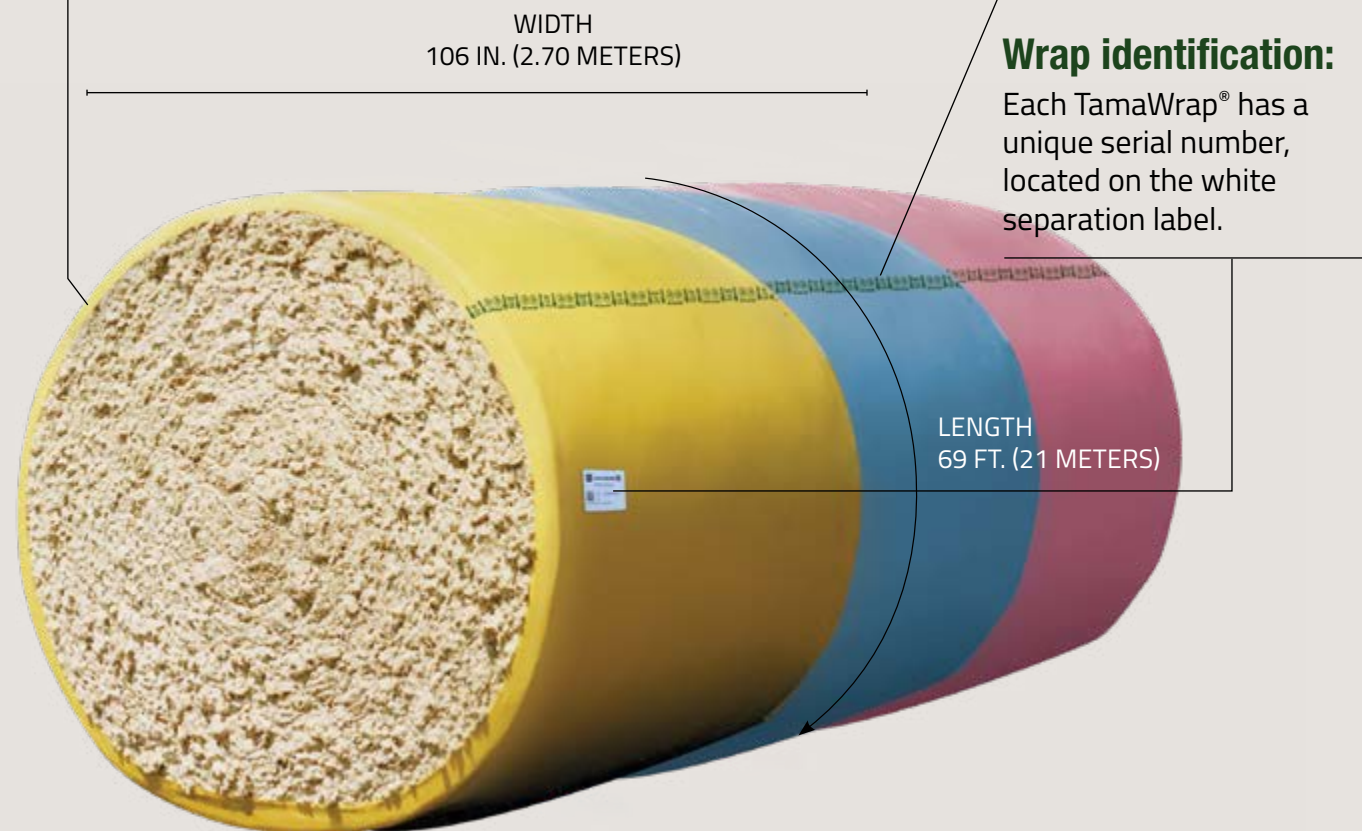

Every TamaWrap® includes 4 RFID tags

Tama Cut Indicator™:

Helps in locating the recommended cutting zone in order to minimize the risk of cotton contamination.

Wrap identification:

Each TamaWrap® has a unique serial number, located on the white separation label.

The TamaWrap® Z-LOCK® wrap portion concept:

TamaWrap® is made of pre-cut wrap portions in order to eliminate the potential of plastic fragments.

The Z-lock® system connects and separates each individual portion on a roll, so the roll is made from 24 "ready to use" portions.

The Z-lock® system assures the next portion is ready to feed correctly.

ROLL

24 Portions of wrap per roll

Plastic core:

Every core is marked on its left hand side, to assist correct installation:

- Black dots or blue stripe on the core.
- A label inside the core.

ROLL WEIGHT:

Approx. 220 lbs (100 kg)

ROLL WIDTH:

9 ft. 2 in. (2.8 meters)

ROLL DIAMETER:

10 in. (25 cm)

Identification:

Each roll has its own ID number located inside the core, and on the leading edge of the 1st TamaWrap®.

PALLET

9 rolls per pallet
216 Portions of wrap per pallet

WEIGHT
2095 LBS (950 KG)

Research & Development

Daniel Taunton, Taubro Ag

We're here for the long term. We get to see it first hand with all the different things Tama R&D team bring out. They're here on the ground every year, supported by John Deere making sure we are getting the best product possible."

Continuous development providing season after season of trouble-free picking

Tama's commitment to research and development is a cornerstone of its success. Each year, R&D efforts are conducted globally, with Australia playing a key role in these initiatives. "Australian cotton growers play a huge role in the R&D trials we conduct each year," Simon Long, Tama Cotton Wrap Commercial Manager notes. "We are always looking for ways to improve efficiencies and prioritise contamination reduction, and it's only thanks to the support we get in-country that these efforts can continue."

The dedication of Australian cotton growers is pivotal to Tama's ongoing innovation. By participating in these trials, growers contribute to the continuous improvement of TamaWrap+, ensuring that it remains

at the forefront of the industry. This collaborative approach has allowed Tama to stay ahead of the curve, anticipating challenges and developing solutions that benefit the entire cotton supply chain.

- TamaWrap® Z-LOCK™ was developed to compliment the John Deere 7760 cotton picker allowing cotton to be baled in a continuous process without stopping the picker.
- It took 10 years of product development in conjunction with John Deere USA to produce TamaWrap® Round Module Wrap.
- Every year Tama run extensive trials in Australia, USA and Brazil to ensure continuous development of TamaWrap® into the future.

Sustainability

Innovation in Agriculture: A Commitment to Sustainability

Tama Australia's commitment to sustainability extends far beyond the Core Collection program. By embracing initiatives that promote recycling and resource efficiency, Tama has positioned itself as a leader in sustainable agricultural practices. The reuse of cotton cores in the production of new TamaWrap® demonstrates a forward-thinking approach, turning what could have been waste into a valuable resource.

This program is just one part of Tama's broader strategy to make agriculture more sustainable. Through ongoing research, innovative solutions, and a focus on circular economies, Tama Australia is driving change in the cotton industry.

Reducing Waste, One Core at a Time

The Core Collection program exemplifies the practical steps that can be taken to reduce waste within the cotton farming industry. By providing farmers with the tools and infrastructure to recycle used TamaWrap® cores, Tama Australia empowers its customers to be part of a circular, sustainable system that reduces the environmental impact of cotton farming.

For cotton growers looking to adopt more sustainable practices, Tama's Core Collection program offers a simple yet impactful way to make a difference. By reusing cotton cores and reducing waste, Tama and its customers are playing a vital role in the future of sustainable agriculture.

Through initiatives like the Core Collection program, Tama Australia is leading the charge toward a more sustainable future in cotton farming - one core at a time.

Core collection program

We're committed to finding long-term solutions for on-farm waste. In 2025, look out for pallets containing re-used cores!

TamaWrap® CORE RECYCLING Sustainability through reuse and recycling

- Place stillage out of direct sunlight
- Place clean cores in stillage

Contact for collection

CottonCustomerService@Tama-Australia.com.au | 03 9361 8100
Malcolm.George@Tama-Australia.com.au | 0407 130 133
James.Baker@Tama-Australia.com.au | 0457 194 357
Asa.Philo@Tama-Australia.com.au | 0459 507 685

For five years, we've been operating a core collection program for growers. By strategically placing stillages on-farm and at dealerships, we are collecting cores for re-use and recycling.

Collection only available for Tamawrap® cores.
Clean cores only - no damaged cores.

FAQ

How many cores fit in a stillage? Approximately 100 cores

When will collection take place? After harvest - we'll be contacting everyone during our annual collection or when stillages are full.

Please note - to maximise freight we will only be collecting full stillages.

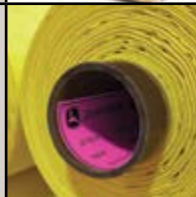

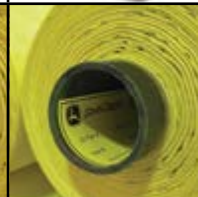

Who do I contact when our stillage is full? Call TamaWrap® customer service - 03 9361 8100, Malcolm George - 0407 130 133, James Baker - 0457 194 357 or Asa Philo - 0459 507 685

Core Labels & Maintenance for TamaWrap® Products

Limited Warranty for TamaWrap® products

Model Year, Handling and Storage Instructions

As we begin production on the 2025 Model Year product we will change the color coding on the pallet label and on the roll labels:

Year	2024	2025	2026
Labels color	Dark Pink	Yellow	Blue
Pallet label Image*			
Roll label image*			

We highly recommend that you and your customers exhaust your supply of 2024 product early in the use season of 2025.

Handling Recommendations*

- Handle one pallet at a time
- Use forklift with lift capacity of at least 4,400 lbs (2 tons)
- Use long forks When handling pallets from the narrow end, to minimize damage
- Use pallet puller when unloading pallets from a truck

Storage Requirements

- Store TamaWrap® under roof in an enclosed structure and avoid extended exposure to sunlight and moisture
- Double stacking of pallets is permissible with proper handling equipment
- To be used within two seasons

Recommendations

- Please ensure the previous seasons product is used first. Rotate stock accordingly

* Instructions apply for all TamaWrap® rolls

Tama warrants and agrees that the individual wrap portion by individual serial number used in John Deere Round Module Cotton Harvesters sold hereunder shall be free of defect, in workmanship and/or materials, for a period of 24 months following the first delivery of TamaWrap® to the buyer and for 6 months after the module was made, provided that:

- The TamaWrap® is kept in their original packaging.
- The TamaWrap® is stored under cover and are not exposed to extreme heat, direct sunlight, or moisture during storage. Double stacking of pallets is permissible with proper handling equipment.
- TamaWrap® products are designed to be staged outside for a maximum of 6 months. Make sure modules are not left exposed to the sun for a longer period of time.
- The TamaWrap® are used in accordance with user manuals or other instructions furnished by Tama.
- Request for warranty by individual serial number must be requested in the use season as the incident occurs.
- Tama's responsibility under this Warranty regarding TamaWrap® found to be defective, will be to replace the defective TamaWrap® with appropriate substitute TamaWrap® free of charge or to refund to dealer the price paid for such TamaWrap® at Tama's sole discretion.
- Tama will not be responsible for and will have no obligation to make repairs or replacements required, in whole or in part, in case the conditions above were not fulfilled.
- **Repair, replacement or refund in the manner provided above will constitute fulfillment of all of tama's obligations with respect to the quality and performance of the products. Tama has made and makes no other warranties whatsoever with respect to the products, express or implied.**
