# ALL AROUND SOLUTIONS

Introducing a totally new patented, highly ventilating load-securing solution

## All around cost-saving

**Significant reduction in cost**

With InnoVent®, you can wrap many more pallets using much less material, reducing the cost-to-wrap load as much as 30%, compared to the traditional way.

## All around Ventilation

**Fresh deliveries in perfect condition**

InnoVent® is a highly ventilating wrap, designed to preserve quality and guarantee the freshness of your products.

## All around Stability

**Proven performance for superior pallet stability**

InnoVent® meets international pallet stability standards, passing the Pallet Lateral Acceleration Test (PLAT) with distinction when compared to traditional corner boards and strapping.

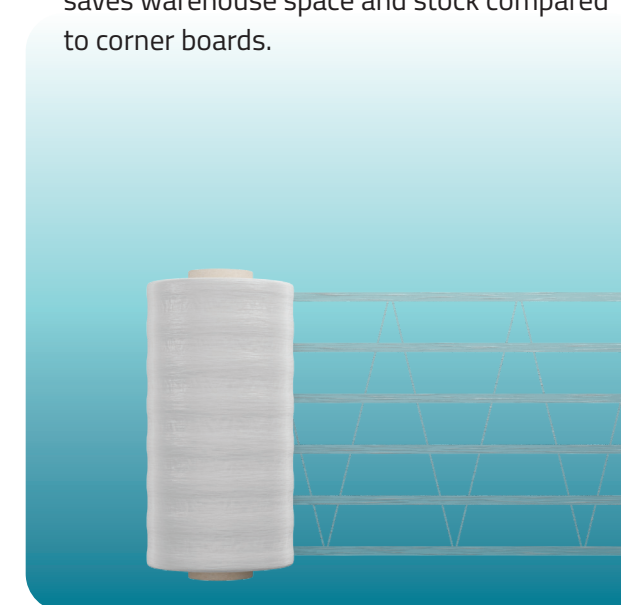

## All around Efficiency

**Improving workflow and reducing downtime**

### Logistic and stock management:

For the same number of pallets, InnoVent® saves warehouse space and stock compared to corner boards.

### Use of wrapping machine:

- InnoVent® is compatible with simple-to-operate wrapping machines, easily integrated into automated warehouse systems.
- Significantly reduces wrapping time for each pallet.
- Allows efficient wrapping for pallets of various heights.
- Wrapping machines provide consistent results and require less expensive maintenance.
